“Green Needs” Focus of VMAC Presentation at APWA

NANAIMO, B.C. – Taking a cue from the concerns of truck owners and fleet managers, VMAC will be presenting an educational talk, *Work Smart and Save Big: Taking Your Air “Green”* at the APWA Exposition, Sunday, September 13, 2009.

With rising fuel costs and increased fuel emission restrictions, proliferating “green” initiatives are applying pressure to service truck owners and fleet managers. Surveys show that a significant percentage of fleet managers have been asked about the environmental impact of their fleet in the past year, and the drive is now on to find ways to cut costs and reduce the company’s carbon footprint. VMAC’s presentation outlines steps designed to meet these challenges, answering both cost and environmental needs, with a focus on the ways vehicle-mounted air compressors can provide a unique and easy way to help fulfill some of those “green needs”.

Work Smart and Save Big: Taking Your Air “Green” will be presented from 3:00 - 3:45 p.m. on Sunday, September 13 in Booth 129 at the APWA Exposition in the Greater Columbus Convention Center, Columbus Ohio.
