### **VMAC Marketing Member Achieves Project Management Credential**

NANAIMO, B.C. – Dan Hutchinson, Product Management Specialist for VMAC, has received his Project Management Professional (PMP) Credential from the Project Management Institute (PMI). PMI is the world's leading not-for-profit membership association for the project management profession, with more than half a million members and credential holders in 185 countries. PMI's worldwide advocacy for project management is supported by globally-recognized standards and credentials, an extensive research program, and professional development opportunities.

The PMP credential recognizes demonstrated knowledge and skill in leading and directing project teams and in delivering project results within the constraints of schedule, budget and resources. The credential requires five years of project management experience in addition to 35 hours of education. Dan completed 120 hours of education toward his credential.

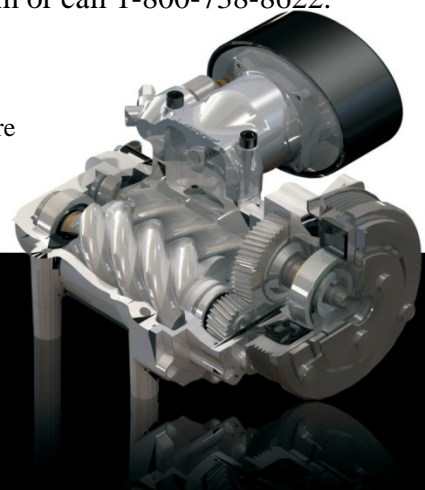

"Acquiring my PMP certification was a very rewarding experience," said Hutchinson. "The support VMAC gave me demonstrates the desire the company has to improve project performance and support staff in accomplishing that goal." Reflecting on how the credential will help future projects, Hutchinson added "By going through the process and education, I'm able to bring more value to our whole project management process."

VMAC actively supports continuing education for all coworkers in addition to the PMI program, including apprenticeship programs for welders and machinists, Strategic Human Resource Management training, PMAC Supply Chain Management training, Certified General Accounting certification, and Professional Engineer credential programs.

For more information about VMAC, VMAC UNDERHOOD and VMAC Hydraulic Air Compressor Systems and Throttle Controls, visit [www.vmacair.com](http://www.vmacair.com) or call 1-800-738-8622.

#####

VMAC is a manufacturer of air compressor systems for the mobile-mechanic, tire service, utilities and construction industries. Specializing in UNDERHOOD and Hydraulic Above-Deck Systems, VMAC is credited with developing the lightest and most compact mobile air compressors available in the industry.
