New VMAC Remote Start/Stop Module for Dodge and Sterling

NANAIMO, B.C. - The VMAC Remote Start/Stop Module is designed for 2007-2009 Dodge 6.7L 2500-5500 Automatic Transmissions and 2007-2009 Sterling Bullet 6.7L 3500-5500 Automatic Transmissions to allow easier remote start/stop of the vehicle. Ideal for bucket truck operators or any work truck requiring a remote engine start, this module allows a vehicle with the key in the RUN position to be engaged remotely.

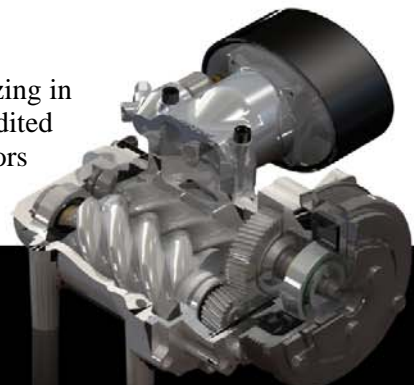

The new Remote Start/Stop Module reduces complexity of installing a remote start/stop. It allows for all day use versus the limitations of OEM and can eliminate the need for an extra PTO-engage switch. From a safety standpoint, the Remote Start/Stop Module requires use of the parking brake.

The Module is designed to work with air-actuated electronic controls for bucket trucks as well as with electric momentary switches. It also interacts with Dodge's Remote Start functions.

For more information about VMAC, VMAC UNDERHOOD and VMAC Hydraulic Air Compressor Systems, visit www.vmacair.com or call 1-800-738-8622.

#####

VMAC is a manufacturer of air compressor systems for the mobile-mechanic, tire service, utilities and construction industries. Specializing in UNDERHOOD and Hydraulic Above-Deck Systems, VMAC is credited with developing the lightest and most compact mobile air compressors available in the industry.
