

## THERMINATOR Hydraulic Oil Cooler A850001 SPECIFICATIONS

The THERMINATOR is a hydraulic cooler ideal for industrial and commercial work trucks, optimizing hydraulic systems by removing large amounts of heat and preventing a loss of responsiveness from truck equipment. By maintaining optimum oil viscosity and performance, hydraulically operated systems including welders, winches, cranes and compressors are utilized to full potential.

Capable of removing up to 33,750 BTU/HR from a lightweight and compact package. The THERMINATOR delivers cool performance, reduces payload and maximizes space on the work truck.

- Hydraulic oil flow: 5 – 20 GPM (19 – 76 L/MIN)
- Hydraulic cooler pressure rating: 500 PSI (34.5 BAR)
- Mounting: 4 x (1/4 - 20) rubber vibration mounts
- Oil connections: # 16 ORB (O-Ring Boss)
- Electrical: Nominal 12V @ 10 amps
- Bypass Check Valve: 65 PSI cracking pressure at zero flow
- 17" x 8" x 13"
- 37 LBS dry

PERFORMANCE CURVE - THERMINATOR
